SPI Marine (Asia) Climate Policy

As a leading service provider to the petrochemical industry we continuously strive to become more environmentally friendly to protect our environment for future generations.

Our strategy includes:

- ✓ Monitoring our environmental performance and reducing our carbon footprint including:
 - building use and process
 - employee travel
 - procurement and product deliveries
 - paper use
 - waste generation
- ✓ Developing end-to-end logistics solutions that can reduce our customers' carbon footprint
- ✓ *Introducing energy efficient solutions for the shipping industry that can reduce ship owners' carbon footprint.*
